SUMMARY

Full-stack developer with 1 year of hands-on experience shipping production web applications end to end — React.js / Next.js front ends, Node.js and NestJS REST APIs, and PostgreSQL / MongoDB data layers. Delivered an enterprise after-sales support platform and two live products — a patient-booking site and a team task-management dashboard — including Dockerised CI/CD pipelines and automated cloud deployments. MCA in Cloud Computing & DevOps. Available to join immediately.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Material UI, responsive UI design

Backend Development: Node.js, Express, NestJS, Flask, REST APIs, GraphQL, WebSockets, Socket.IO, JWT & CASL authorisation

Databases: MongoDB, PostgreSQL, SQL, Prisma, TypeORM, schema design, indexing & query optimisation

DevOps & Cloud: Docker (multi-stage builds), GitLab CI/CD, GitHub Actions, Continuous Integration, AWS, Microsoft Azure, Linux, cloud VM deployment

Tools & Practices: Git, Postman, Jest, Agile, Scrum, Software Development Life Cycle (SDLC)

EXPERIENCE

Software Developer Intern — Walkwel Technology, Mohali

Feb 2026 – Jul 2026

- Built client onboarding, product catalog and order-management modules for an enterprise after-sales support platform using NestJS, PostgreSQL and TypeORM, including a multi-step client approval workflow and a version-controlled Knowledge Base with document-level access control.
- Implemented a real-time support-ticketing system with technician assignment and inspection workflows over WebSockets, with role-based access control (CASL + JWT) across Client, Technician and Admin roles.
- Designed relational schemas and REST APIs for a project/sprint/task management system with a Next.js drag-and-drop task board and rich-text editing; added per-user permission overrides and automated task reassignment.
- Integrated third-party systems (Zoho, Keka) through scheduled background sync jobs.
- Wrote unit, integration and end-to-end tests in Jest and built a GitLab CI/CD pipeline automating database migrations, seeding, test execution, image publishing and rollback across dev, test and production Docker environments.

Front End Developer Intern — Imarticus Learning

Jan 2024 – Apr 2024

- Built responsive, reusable user-interface components using React.js, JavaScript, HTML and CSS, and integrated them with REST APIs.

PROJECTS

De Royal Kore — Patient Booking Platform (live at <https://deroyalkore.com>)

Jul – Aug 2026

- Shipped a live patient-facing website, appointment-booking system and admin dashboard using React, TypeScript, Node.js and Express with a layered REST architecture (routes → controllers → services → repositories).
- Optimised MongoDB with indexing, connection pooling and pagination; containerised the stack with multi-stage Docker builds and automated deployment to a cloud VM via GitHub Actions and SSH.

Internal Task & Management Dashboard (live at 161.118.177.117:3000)

Aug 2026 – Present

- Built a full-stack team task-tracking dashboard — task CRUD with assignment, priority, status and due dates, plus comments, file attachments and a metrics dashboard covering total, pending, overdue and completed tasks.
- Implemented JWT authentication and role-based access control across Admin, Manager and Member roles; designed a normalized PostgreSQL schema with Prisma and built REST APIs with backend-driven search, filter, sort and pagination.
- Added real-time updates over Socket.IO and a GitHub API integration.

AI Career Coach (live at [live demo](#))

Feb – Mar 2025

- Built a full-stack Next.js 15 career platform with a modern landing page and a highly secure email OTP (One-Time Password) login system backed by PostgreSQL.
- Created a personalized **onboarding** experience that uses AI to instantly generate custom **industry insights**, **ATS-friendly PDF resumes**, and tailored **cover letters** based on the user's profile.
- Engineered a highly reliable AI system with a multi-provider fallback (Google Gemini → Groq → OpenAI) to ensure features never fail, and wrote automated Playwright tests to guarantee platform stability

EDUCATION

MCA, Cloud Computing & DevOps — Chandigarh University, Mohali | 2024 – 2026

BCA, Cloud Computing — Panipat Institute of Engineering & Technology, Panipat | 2021 – 2024
